Additional comments about dimensional stability

The shrinkage value is an average between the batches produced and may be subject to change.

Do not leave dirty clothes together in a closed place for a long time, always keep separated in a cool and ventilated place. Separate by light and dark colors. Use neutral soap. Do not twist.

GENERAL COMMENTS

- Remove the excess water without twisting, the style crumples easily.
- Iron with protective fabric over the style, to avoid seam marks of seams and brightness during ironing.
- The washing mode is performed on the fabric, but after the fabric is converted into clothing, it must be evaluated (clothing appearance, use of other fabrics, use of interfacing / interlinings, etc).
- Be careful of the fabric getting in contact with abrasive surfaces, yarn may be tugged.
- Do not mix batches.
- Claims will be accepted within 15 days after receipt of the goods.
- All tests mentioned above were performed through NBR, ISO, AATCC standards and / or internal standards.
- It is recommended to perform solidity tests before cutting if you are going to mix light and dark colors in the same piece.
